LETTER OF GUARANTEE

January 2, 2026

Dear Customer,

Savencia USA LLC guarantees that no articles of food manufactured by our subsidiaries or distributed by us, shall, upon delivery by us to you, be adulterated or misbranded within the meaning of the Federal Food, Drug and Cosmetic Act of June 25, 1938, as amended (the Federal Act”) or within the meaning of any state food and drug law, adulteration and misbranding provisions of which are identical with, or substantially the same as those found in the Federal Act, and that such goods will not be produced or shipped in violation of Section 404 or 301(d) of said Federal Act. Notwithstanding the foregoing, (a) we do not guarantee against such goods becoming adulterated or misbranded within the meaning of the Federal Act or other acts by reason of causes beyond our control, and (b) where goods are shipped under packaging (including labels) provided by a third party (including you), our responsibility for misbranding shall be limited to that resulting from the failure of the product to conform to the label furnished by the third party. Savencia Cheese USA LLC further guarantees its compliance with the Food Safety Modernization Act.

In the event an action is brought to enforce any provision of this Letter of Guarantee, you shall be responsible for our attorney’s fee, to the extent such action is unsuccessful.

If you have any question, or need additional clarification, please contact your sale or export representative. This Letter of Guarantee shall be valid for no more than one year from the date hereof and maybe cancelled as to unshipped product upon thirty (30) days written notice.

Sincerely,

Louise Newswanger

BOVINE SPONGIFORM ENCEPHALOPATHY STATEMENT

January 2, 2026

Dear Valued Customer:

Savencia Cheese, Fleur de Lait East (New Holland Facility); Fleur de Lait West (City of Industry Facility), Kolb Lena (Lena Facility) and Rogue Creamery (Medford Facility) is committed to ensuring that our products adhere to the highest standards of food safety and quality. We only use food ingredients that have been recognized as safe by leading regulatory authorities.

Our dairy products are sourced from domestic suppliers and manufacturers, we do not import any raw dairy ingredients.

To the best of our knowledge, the product(s) manufactured at these facilities do not contain any ingredients that would be subject to BSE (Bovine Spongiform Encephalopathy Statement) or FMD (Foot and Mouth Disease). Neither disease is considered a threat with milk products, but rather it becomes a concern with the meat of the animal. It affects the brain tissue and can be found in the marrow, but to the best of our knowledge does not carry through to the milk.

Sincerely,

Louise Newswanger
Corporate Quality Assurance Manager
Savencia Cheese USA LLC
Mobile: (717) 327-3361
louise.newswanger@savencia.com

BISPHENOL A (BPA) STATEMENT

January 2, 2026

Dear Valued Customer:

Savencia Cheese, (Fleur de Lait East, Fleur de Lait, West and Kolb Lena facilities) is committed to ensuring that our products adhere to the highest standards of food safety and quality. We only use food ingredients and packaging that have been recognized as safe by leading regulatory authorities.

All packaging used at the facilities listed above do not contain Bisphenol A (BPA).

Sincerely,

Louise Newswanger
Corporate Quality Assurance Manager
Savencia Cheese USA LLC
Mobile: (717) 327-3361
louise.newswanger@savencia.com

PROP 65 DRINKING WATER and TOXIC ENFORCEMENT ACT STATEMENT

January 2, 2026

Dear Valued Customer:

Savencia Cheese is committed to ensuring that our products adhere to the highest standards of food safety and quality. We only use food ingredients that have been recognized as safe by leading regulatory authorities.

We have reviewed the ingredient(s) and to the best of our knowledge, the products we import and manufacture at our facilities do not contain any contaminants or by-products known to the State of California to cause cancer or reproductive toxicity as listed under Proposition 65 Drinking Water and Toxic Enforcement Act (http://oehha.ca.gov/prop65/prop65_list/newlist.html.)

Sincerely,

A handwritten signature in black ink that reads 'Louise M. Newswanger'.

rBST STATEMENT

January 2, 2026

Dear Valued Customer:

Savencia Cheese USA LLC, Fleur de Lait East (New Holland, PA facility) is committed to ensuring that our products adhere to the highest standards of food safety and quality. We only use food ingredients that have been recognized as safe by leading regulatory authorities.

Although no significant difference has been shown between milk derived from rBST-treated and non-rBST treated cows, **all products manufactured and distributed from this facility are produced with cows not treated with rBST.** Our transition to rBST-free production is a result of increasing consumer awareness of and demand for rBST-free dairy products.

Sincerely,

Louise Newswanger
Corporate Quality Assurance Manager
Savencia Cheese USA LLC
Mobile: (717) 327-3361
louise.newswanger@savencia.com

BIOENGINEERED STATEMENT

January 2, 2026

Dear Valued Customer:

Savencia Cheese USA is committed to ensuring that our products adhere to the highest standards of food safety and quality. We only use food ingredients that have been recognized as safe by leading regulatory authorities.

The National Bioengineered Food Disclosure Law, passed by Congress in July of 2016, directed USDA to establish a national mandatory standard for disclosing foods that are or may be bioengineered. The Standard defines bioengineered foods as those that contain detectable genetic material that has been modified through certain lab techniques and cannot be created through conventional breeding or found in nature. The mandatory compliance date is January 1, 2022. The Agricultural Marketing Service (AMS) developed a List of Bioengineered Foods which can be accessed by this link <https://www.ams.usda.gov/rules-regulations/be/bioengineered-foods-list>.

Products manufactured at Savencia Cheese USA (City of Industry, CA, New Holland, PA, Kolb Lena Inc., Ill and the Imported Cheeses) do not appear on the Bioengineered Food List. Also, these products do not contain ingredients that are on or derived from those on the AMS list of Bioengineered Foods List.

Should you have questions or concerns, don't hesitate to get in touch with me at 717.337.3361.

Sincerely,

Louise Newswanger

ALLERGEN STATEMENT

January 2, 2026

Dear Valued Customer:

Savencia Cheese is committed to ensuring that our products adhere to the highest standards of food safety and quality. We only use food ingredients that have been recognized as safe by leading regulatory authorities.

All products manufactured at our City of Industry, Kolb Lena, Inc. New Holland facilities are dairy products which contain milk and other dairy ingredients and therefore are considered to contain allergens.

Below is a table of FDA recognized Allergens and what allergens are present in our facility.

COMPONENT & DERIVATIVES	PRESENT IN PRODUCT	PRESENT IN OTHER PRODUCTS MANUFACTURED ON THE SAME LINE	PRESENT IN THE SAME MANUFACTURING PLANT
PEANUT	NO	NO	NO
TREE NUT	NO	NO	NO
DAIRY MILK	YES	YES	YES
EGGS	NO	NO	NO
SOY	NO	NO	NO
SHELLFISH	NO	NO	NO
WHEAT	NO	NO	NO
FISH	NO	NO	NO
SESAME	NO	NO	NO

**NOTE: Savencia Cheese has an E-commerce platform in our finished goods warehouse (separate from the manufacturing facility) and may from time to time include retail packaged items that contain allergens. The items are individually packed, stored in the warehouse, and are never opened onsite. At this time the only non-milk allergens items stored onsite at FDLE finished goods warehouse are items that contain wheat, soy and celery. A control plan is in place.*

Below is a table of sensitivities and these are not regulated or monitored by the FDA.

COMPONENT & DERIVATIVES	PRESENT IN PRODUCT	PRESENT IN OTHER PRODUCTS MANUFACTURED ON THE SAME LINE	PRESENT IN THE SAME MANUFACTURING PLANT
CORN	NO	NO	NO
CELERY	NO	NO	NO
MUSTARD	NO	NO	NO
SESAME	NO	NO	NO
CEREAL/GRAINS CONTAINING GLUTEN	NO	NO	NO
SULPHITES	NO	NO	NO
LUPIN	NO	NO	NO
MONOSODIUM GLUTINATE (MSG)	NO	NO	NO
SEED (SUNFLOWER Lecithin)	NO	NO	NO

COUNTRY OF ORIGIN

January 2, 2026

Dear Valued Customer:

All food products of Savencia Cheese-USA are manufactured per applicable regulations as determined by United States law. Savencia Cheese-USA includes the production facilities located at New Holland, PA, Lena, IL, and City of Industry, CA USA.

All products are identifiable by the presence of lot codes on the packaging. This ensures the traceability of all products back to the pasteurized source milk. Records of this pasteurization are maintained at each production facility for not less than two years.

If you have any questions or need additional clarification, please contact your sales, or import representative.

Sincerely,

A handwritten signature in black ink that reads 'Louise M. Newswanger'.

January 2, 2026

Dear Valued Customer:

Savencia Cheese USA is committed to ensuring that our products adhere to the highest standards of food safety and quality. We only use food ingredients that have been recognized as safe by leading regulatory authorities.

Savencia Cheese is not aware of intentionally added per- and poly-fluoroalkyl substances (PFAS), or the presence of 100 parts per million or more of total organic fluorine, in the food packaging we sell to you.

Sincerely,

Louise Newswanger
Corporate Quality Assurance Manager
Savencia Cheese USA LLC

FDLW HACCP/ HARPC OVERVIEW

PURPOSE: *This document provides an overview of FDLW, a division of Savencia Cheese USA-HACCP program.*

SCOPE: *This document pertains to FDLW, a division of Savencia Cheese USA products and processes.*

RESPONSIBILITIES: *The HACCP coordinator and the HACCP team are responsible to review and update on a yearly basis or when a product or process change occurs.*

DEFINITIONS:

HACCP-Hazard Analysis Critical Control Point

HARPC- Hazard Analysis and Risk Based Preventive Controls

FDLW, a division of Savencia Cheese USA staffs 55 full time employees and utilizes temporary staff as needed for production demand. FDLW, a division of Savencia Cheese USA crafts delicious cheeses that brings people together and inspires them to enjoy life. Our products include Cream Cheese, Neufchatel, Manufacturing Cheese, and Creme Fraiche. FDLW, a division of Savencia Cheese USA operates 5 to 7 days with three shifts two production shifts and a third shift sanitation. Cleaning and sanitizing of all processing equipment is conducted per a master sanitation schedule. The facility uses city water and is tested bi-annually.

This HACCP Plan covers the production of Cream Cheese, Neufchatel Cheese, Manufacturing Cheese, and Crème Fraiche.

Savencia has 1 Food Safety/HACCP Plan that covers the production of Cream Cheese, Neufchatel Cheese, Manufacturing Cheese and Crème Fraiche, flow charts are included within the Food Safety/HACCP plan.

Savencia has a Food safety/HACCP plan that is compliant with both GFSI and FDA requirements.

HTST pasteurization, Antibiotic testing of raw milk, and foreign material detection are the 3 critical control points (CCPs) at the City of Industry Facility.

Preventive Controls have also been identified. A summary table of the identified preventive controls/CCPs can be found below:

Hazard	Preventive Control /CCP	3 lb	30 lb	25 lb	8 oz
Receiving Packaging that does not state Contains Milk	ALLERGEN CONTROL	X	X	X	X
Receiving Ingredients that contain unapproved allergens	ALLERGEN CONTROL	X	X	X	X
Receiving Milk with Antibiotics	SUPPLIER CONTROL /CCP	X	X	X	X
Receiving Ingredients that contain microbiological contaminants	SUPPLIER CONTROL	X	X	X	X
Microbiological organisms in Raw Cream Cheese Mix	PROCESSING CONTROL/ CCP	X	X	X	X
Physical Contamination (Metal and/or Glass)	PROCESSING CONTROL /CCP	X	X	X	X
Microbiological organisms at Ingredient skid/kettle	PROCESSING CONTROL	X	X	X	X
Microbiological organisms at Fill	PROCESSING CONTROL	X	X	X	X
Microbiological organisms during refrigeration	PROCESSING CONTROL	X	X	X	X
Microbiological organisms during product staging	PROCESSING CONTROL	X	X	X	X
Microbiological organisms during shipping/loading	PROCESSING CONTROL	X	X	X	X
Physical Contamination (Metal and/or Glass) at Rework	PROCESSING CONTROL	X	X	X	X
Microbiological organisms at Rework	PROCESSING CONTROL	X	X	X	X
Introduction of Environmental Pathogens	SANITATION CONTROL	X	X	X	X

Below is a list of the Prerequisite Programs that support the Food Safety/HACCP Plan:

Good Manufacturing Practices: FDLW, a Division of Savencia Cheese USA meets or exceeds GMP regulations. Employees are given a copy of the GMP's and trained when hired and given refresher courses in the proper application of these rules periodically. All visitors and contractors to the facility are instructed on GMP's and are required to follow them as well. The procedures and compliance at this facility are audited on an annual basis by the Corporate Quality Assurance office. The internal audit team also audits the GMP's in housekeeping, third party, and Customer audits. Non-compliance situations are resolved in writing at the time of the infraction.

Allergen Program: Dairy products are themselves considered to cause allergenic reactions in some people. The product ingredient statements on our products declare the presence of dairy ingredients or other specific allergens if applicable. An allergen program is in place for all allergens other than milk. Sanitation cleans all equipment after every production day and Quality Control performs pre-operational inspections.

Regulatory Inspection Program: FDLW, a division of Savencia Cheese USA is inspected through various regulatory agencies including the FDA, CDFA, and military.

Preventative Maintenance Program: The Preventative Maintenance program at Fleur de Lait West is controlled through a database. All equipment requiring PM or calibration is listed in this database. The Maintenance department sets schedules, which are then automatically maintained. When a prescribed maintenance duty is due, work requests are produced and assignments distributed by the Supervisor for completion. Tasks are tracked for completion and for other issues that need to be addressed. This system has increased productivity, reduced downtime, and errors due to equipment. Preventative and corrective maintenance activities are carried out on all equipment in the production facility.

Lot Coding Program: All products are identified by a lot code that is printed on the case label. A lot code explanation can be found on the spec sheet for each individual product.

Receiving Program: All raw milk is tested for antibiotics and if found positive, milk is discarded using CDFA protocol. The producer is notified and the procurement department follows up with the broker. Incoming ingredients, product transfers, chemicals, pallets, equipment are received by set procedures and stored in the appropriate manner. Any incoming items that do not meet standards are rejected at that point. Traceability is always maintained within this system. Quality Assurance tests incoming ingredients for suitability prior to use. Until approved, such products are on hold and not available for production.

Shipping Program: Procedures are in place identifying the shipping procedures that will be used to assure product integrity is not compromised during the loading and transport stages. Shipping staff is trained on these procedures annually.

Glass, Hard Plastic and Wood Program: All Glass, Hard Plastic, and Wood pieces are identified on a master register. Items inventory is done once a year to identify non-conformances. Brittle plastic near the production lines is inspected more frequently to prevent contamination.

Label Review: All new labels are created and reviewed prior to first production. Procurement, Operations, and Quality all inspect new labels for customer and regulatory conformance. Active labels are reviewed during production (at start-up and changeovers) for compliance.

Separation of Containers and Tools: FDLW, a division of Savencia Cheese USA implements a color-coding system to identify tools to be used for raw, cleaning, and finished product processes. Employees are trained on this color code system.

Weight Control: Weight checks are a daily requirement throughout the production run. Corrective actions are implemented if weights do not conform to regulatory and customer requirements.

Sanitation Program: Savencia Cheese USA LLC utilizes a dedicated sanitation staff. Sanitation is performed on third shift. All equipment is inspected and re-sanitized prior to production activities. The facility maintains work instructions on the sanitation of all equipment via our SQF documentation system. Quality Control performs a random pre-operational inspection with swabbing prior to operation. In addition, the Operator on each line performs a start-up inspection checklist before beginning production. Documentation of all activities involving sanitation is controlled and available for review. All chemicals and supplies used are approved for use in food manufacturing facilities and are clearly labeled. Master sanitation of the facility is under the control of the Sanitation Lead who directs his employees in this area.

Production/Sanitation Leads signs off on charts for verification of CIP system.

Internal inspection Program: Internal inspections are completed at regular intervals throughout the year for all major functions at the facility. Non-conformances are communicated with the appropriate personnel and corrective actions are issued.

Foreign Material Program: FDLW, a division of Savencia Cheese USA LLC uses metal detectors, x-rays, screens, and filters as part of a comprehensive foreign material program. Units are operated throughout the run by trained individuals.

Traceability Program: Incoming ingredients and raw materials are all pre-approved with Certificates of Analysis for critical ingredients or spot inspections. Ingredients must meet specifications as determined by regulation and corporate standards. Any ingredient that does not meet these standards is rejected. These procedures are written in our QMS system. All ingredient lot codes are recorded to facilitate recall procedures.

All finished products are bar-coded at production and entered the inventory tracking system. This information includes product identification, date and time of manufacture, customer codes, information and tracking codes. Individual cups are also normally marked as well. All product shipped from this facility is recorded on Bill of Lading. This document records the customer who purchased and the product codes they received. This system is tested via mock recalls conducted by the Quality Manager and the Recall Team on an annual basis.

Storage and Temperature Controls: Storage and temperature controls are monitored by trained personnel to maintain integrity and food safety of our products and materials. Records are kept showing conformance.

Environmental Monitoring Program: The Environmental Monitoring program at FDLW, a division of Savencia Cheese USA consists of ATP swabs during pre-operations to verify Sanitation activities were effective, random cleaning surface swabs, pathogenic zone swabbing, air plates, and water testing. All testing is completed by the QA staff.

Pest Control: The manufacturing facility is designed in a way that discourages the presence of pests and controls potential access points. FDLW, a division of Savencia Cheese USA LLC utilizes the resources of an outside vendor to provide additional expertise in pest control management. This service includes maintenance of indoor traps and outdoor bait stations and all insecticide applications. All records of the activities of the pest control program are maintained and reviewed by the Plant Manager and Quality Manager to resolve the results of any non-conformance.

Water, Air and Ice Supply: Water used in the production process is verified to be potable by two methods. First, potable water certificates are obtained from the Rowland Height Water District

on a yearly basis. Water samples are taken at random points in the process monthly. Water sample sent out for microbiological testing yearly.

Chemical Control: All chemicals used in the plant meet required food contact regulations. Copies of the SDS records are available for review by all employees and are posted in an accessible location. All chemicals are labeled as to their identity. Cooling applications in the plant environment related to manufacturing are maintained by a glycol system and are monitored by the California Department of Food and Agriculture. Ammonia is used in a primary cooling application. Procedures and annual testing take place to train the personnel on how to react in case of emergency. Posted evacuation plans and windsock are present at the facility.

Training: Employees are trained in the proper method of performing their tasks in a safe, sanitary, and proper manner as determined by the Plant Manager and SQF procedures. Human Resources maintain the training records for their area. Employees receive additional training coordinated by the SAVENCIA CHEESE USA LLC Safety Manager in such areas as Chemicals, Safety, Pasteurization, Milk receiving and testing, PPE, Confined Spaces, Eye and Hearing Protection and Personal Hygiene.

Supplier Approval Program: Purchasing and Quality Assurance approve all suppliers for ingredients used in the manufacturing process of cream cheese. Corporate management reviews alternate supplier sources and determines acceptability. All suppliers are required to have their own traceability and recall programs in place. Suppliers must go through a pre-approval process and once accepted, are continuously rated on their performance. Suppliers that show a negative trend are notified of this and purchasing will work with them, if warranted, to correct the defect. Suppliers are audited for conformance to our standards by Quality Assurance.

Food Defense Program: SAVENCIA CHEESE USA LLC uses a 3rd party security company to monitor the site continuously. Video cameras with recording devices are also used to continuously monitor sensitive areas. The production facility is access controlled at all points of entry. Security cards are issued to all employees who need access. The cards only allow access

to authorized sections of the facility. Field personnel are trained in steps and procedures to minimize the opportunity for outside agents to compromise the integrity of our ingredient supply. All visitors and contractors are required to check in and out when visiting the facility. They are also required to identify themselves with a badge and blue hairnet when going in the

production floor. SAVENCIA CHEESE USA LLC also has a written contingency plan covering responses if a catastrophic event occurs at the plant.

Visitor Policy: All visitors are required to follow the same GMP policies as our employees (with minor modifications). Training on GMPs is completed at the time a visitor arrives to the plant.

Customer/Consumer Complaint: All customer complaints are routed through the Customer Service and QA Departments. Every complaint is reviewed and investigated. A formal response is then generated for the customer. In addition, a corrective action is written to resolve and reduce the chance of occurrence in the future. These complaints are reviewed with Upper Management for compliance and resolution. The QA department determines if a health risk is involved. If so, the Recall Coordinator activates the Recall Team for immediate response to the situation.

CAPA: Corrective and Preventative Actions are tracked and monitored to continuously improve our processes and procedures. CAPA reports are filed and reviewed by management.

Non-conforming Material Control Program: Non-conforming materials are tracked through non-conforming reports. Procurement is notified of non-conforming materials so suppliers can issue corrective actions.

Document Control: All documents and records are issued a number identifying it as a part of our document control program. Documents are reviewed and revised if necessary.

Facility Construction and Control: The Savencia Cheese USA LLC facility is designed for food manufacture and follows all applicable regulations. The process is always performed in a controlled, sanitary environment. All changes to the facility are approved in advance by the VP of Operations and reviewed for suitability and sanitary design.

Specifications: All products and ingredients have written specifications as determined by standards of identity and internal SAVENCIA CHEESE USA LLC standards. Only authorized parties are allowed to modify a specification, and a formal approval process is used to validate the change. Any products that do not meet standards are placed on hold for Quality review and disposition.

Product Release: All finished product is tested for pathogens using the Hold/Release program.

Product Equipment: All equipment used in the manufacture of food products is constructed and maintained in a sanitary manner. Operators and Sanitation personnel are trained in the proper use and care of the equipment within their area of responsibility. All machines are selected for ease of cleaning, safety, ease of operation, and correct regulatory compliance. Each piece of equipment is maintained via a preventative maintenance plan.

Finished Product Testing: All product manufactured at Savencia Cheese USA is sampled and tested for pathogens daily. Quality Control collects samples throughout a production lot and samples are submitted for testing. Products are placed on hold until the reports are received and reviewed. Products are released from hold only if negative results are obtained.

The HACCP Team is comprised of a trained, cross functional team. Below is a list of the HACCP Team:

Quality Manager (HACCP Coordinator)
 Plant Manager
 Maintenance Manager or Lead
 Production and Sanitation Lead
 Shipping and Receiving Lead
 Corporate Quality Assurance Manager-(HACCP Coordinator back up)
 Procurement (Corporate)

The HACCP team conducts annual HACCP plan review and determine any changes or revisions that need to be completed. In addition, the HACCP team reviews changes in the process to determine the effect on the hazard analysis and critical control points. The team conducts monthly meeting and additional meetings as warranted to address specific food safety issues that arise.
